Apple RSI at the next close (2020-2022)

Returns from 2020-01-03 to 2022-12-30 · 755 observations

CONCLUSION HISTORICAL

The benchmark-relative difference is indistinguishable from zero in this sample

Information ratio interval (95.00%): −2.11 to 0.16. This evidence declares no decision criteria.

PERFORMANCE AND RISK

RETURNS

Cumulative return

−0.36% versus 76.63% for AAPL.

RISK

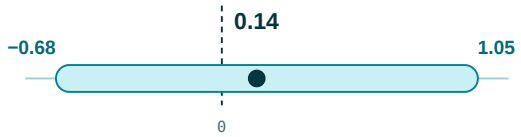

Annualized volatility

29.47% versus 36.93% for AAPL.

KEY FIGURES

METRIC	STRATEGY	BENCHMARK
Annualized compound return	**−0.12%**	20.91%
Sharpe	**0.14**	0.70
Maximum drawdown	**−29.19%**	−31.43%

Strategy Sharpe ratio interval

The bar shows the 95.00% interval for the strategy Sharpe ratio. Standard error 0.43.

SCOPE OF THE RESULT

EVIDENCE LEVEL **Historical**

- **Scope.** The report summarizes the return series in the bundle.
- **Signature.** No verified signature. Confirmatory provenance unverified.
- The engine recomputed the metrics from verified StrategyTrace net returns.
- **Annualization.** 252 periods per year. Annual risk-free rate 0.00%.
- **Uncertainty.** The bootstrap resamples the same historical return series. A directional statement requires agreement between the interval and the HAC test. With few observations, both methods can overstate the evidence.
- Monte Carlo has its own hash. It affects criteria only if preregistered for that purpose.

CRITERIA EVALUATED

This evidence declares no decision criteria.

ASSESSMENT LIMITS

- **Survivorship bias.** Not assessed. Historical universe membership is missing (SURVIVORSHIP_BIAS_NOT_CONTROLLED).
- **Look-ahead bias.** Not assessed. The report does not verify when signals became available.
- **Multiple testing.** DSR and PBO cannot be assessed from the evidence supplied.
- **Costs and execution.** Gross and net returns were reconciled with recorded costs. Cost sensitivity and actual execution were not assessed.
- **Use of AI.** The evidence does not say whether Strateva used AI in the review.
- **Advice.** This report does not constitute investment advice.
